Jordan Manufacturing Company, Inc. is pleased to announce their new consolidation program which will bring seven new categories of items into our offerings. All of the items within this catalog can be consolidated into containers in China for direct shipments reducing shipping costs and transportation time.

With our new consolidation program Jordan Manufacturing Co., Inc. is able to offer products of the best quality at the lowest price on a direct ship basis. We are already working on additional items to be added to our program for the 2007 shipping season which will make it easier to consolidate containers to multiple shipping locations which will again reduce freight and handling cost.

There are several requirements to make this program work efficiently for everyone.

Requirements are;

Any shipment to ship (shipments are FOB Shanghai or FOB Shengzhen) from China prior to February 28, 2006 must be ordered no later than October 1, 2005. We must have a Purchase Order with all shipping information, carton markings, etc. Any shipment on initial orders to ship earlier than February 28, 2006 must be ordered allowing an 85 day lead time prior to shipping from China. Reorders must be ordered with a 55 day lead time from the required shipping date from China. These requirements are to insure that all shipments will be made on time and allow Jordan Manufacturing Co., Inc. to order all items, receive them in China and consolidate them.

It is strongly recommended if at all possible that you place initial orders prior to October 1, 2005 and allow more than 55 days lead time for the shipment to sail from China on reorders. October through February are the heavy production and shipping season for the items in this catalog, the Chinese New Year disrupts production and shipping for several weeks plus the additional security requirements for shipping into the USA have increased the shipping times.

Any order must be for a minimum of one 40' container or two 20' containers if shipping to different locations is desired.

You will notice minimum production run listed by each item in the catalog. This is the minimum required by the factories so each item must either meet these minimums or Jordan Manufacturing Co., Inc. must be able to combine orders from more than one customer to ship at the same time. The Sales Department at Jordan Manufacturing Co., Inc. will work with you if you would like to try to consolidate orders which are less than the minimum production run but some flexibility on the shipping date may be required in the case.

For large production runs of a single item private labeling is available.

We welcome you into our new program and look forward to serving your needs. Many additional items will be added annually to further expand this program to better meet your needs.
